

ETFO CREDIT COURSES

A new ETFO Credit Course: Collaborative Inquiry for Students™

Experience new methods

ETFO's newest credit course, Collaborative Inquiry for Students: Preparing Minds for the Future™, uses the latest research to equip you with a powerful and easy way to help your students learn.

- Help your students develop collaboration skills and real-world habits that will equip them to live, learn and work in a global community.
- Use the Appreciative Inquiry model (discover, dream, design, deliver) to structure collaborative inquiry.
- Become an effective facilitator. Lead your students in working with content, processes and emotions.
- Identify compelling reasons to provide collaborative learning experiences in your classroom.
- Explore the strategies that will help your students develop techniques for collaboration, communication and decision-making.
- Develop questions, outcomes, directions and assessments you can use in the collaborative inquiry process.
- Use tools to design, deliver and evaluate a range of collaborative inquiry experiences for students.

Bring new techniques to your classroom with Collaborative Inquiry for Students™ and ETFO Credit Courses: face-to-face, practical fun.
